## companyprofile

Founded in 1967, Maxxis has grown to become one of the largest and most respected tyre manufacturers in the world. Building on its core beliefs of working with its partners to deliver 100% Quality, 100% Trust and 100% Service, Maxxis is now a world-class tyre manufacturer operating from state of the art R&D and production facilities, producing in excess of 1,000,000 tyres and tubes per day, with a turnover exceeding \$3.2 billion [2010].

# PRO R1

## a natural in wet conditions

### ULTRA R RUBBER<sup>®</sup>

A natural in the wet, the Maxxis PRO R1 is like a fish to water. The specially developed ULTRA R RUBBER<sup>®</sup> tread compound delivers long life, outstanding fuel consumption and superior wet grip. The advanced tread pattern design, channeling water away from the contact patch via its four central grooves.

... More than meets the eye

# MAXXIS<sup>®</sup>

for a closer look log on to [www.maxxis.co.uk](http://www.maxxis.co.uk)

- All-season UHP tyre with aggressive unidirectional tread design
- Excellent cornering and handling from a high bead filler and stiff shoulder blocks
- Advanced silica compound for improving wet and dry traction and rolling resistance giving better mpg
- Specially designed high rim protector

- Unidirectional UHP all-season tyre with a solid centre rib and V-shaped aggressive tread pattern
- Silica rich V-shaped unidirectional tread pattern with 4 circumferential grooves gives improved handling on dry and wet roads
- Multiple snow-biting grooves and optimal siping design for great traction on snowy surfaces
- 5-pitch tread blocks and 2-in-1 groove designs minimise noise for a quiet, comfortable ride

# BIGHORN

## a tough tyre that's thick skinned

### MTS SKIN<sup>®</sup>

They say that beauty is only skin deep, but it's what lies under the surface which is the true beauty. The Maxxis Bighorn comes in 8 or 10 ply tyre with MTS SKIN<sup>®</sup>. The layers of ply prevent the rubber stretching under pressure while the enhanced sidewall construction helps resist punctures and delivers a really durable performer ... *More than meets the eye*

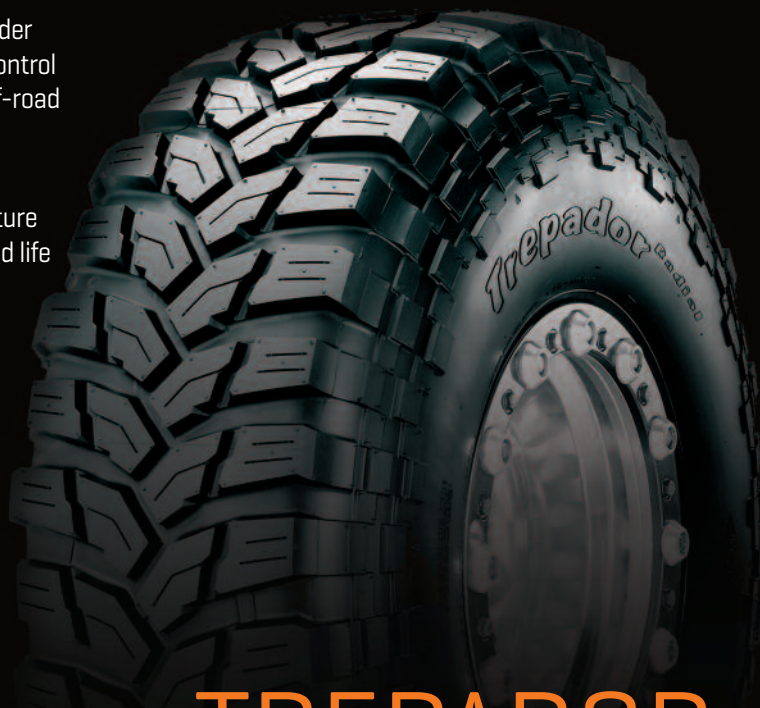

# MAXXIS<sup>®</sup>

## orangeengineering

The Maxxis Orange Engineering concept underpins all that we do. It is more than the technical excellence behind our products, albeit this is impressive enough as evidenced by the most advanced Research and Development Centres using the most sophisticated state of the art equipment, in locations across three continents.

It also means the best in raw materials, working with only the most trusted, skilled and reliable supply partners, having perhaps the industry's most rigorous quality control systems and of course a company culture where its employees take a pride in their company and its products and accept nothing less than the best.

---

## t3businessmodel

On a more defined level Maxxis has adopted a Business model which denotes three dimensions as intrinsic to the Company's success, namely 100% Quality, 100% Service, 100% Trust.

**100% Quality.** Our products meet and we hope exceed our customers' expectations. They are manufactured to exacting standards which are replicated each and every time such that our customers should expect zero defects.

**100% Service.** The company is geared to always provide what our customers want when they want them. To achieve this, the supply and supplier network needs to operate at optimum efficiency.

**100% Trust.** As long as the company is successful in achieving its goals of delivering to its customers, staff and shareholders 100% Quality and 100% Service, then it can reasonably expect to achieve 100% Trust. We believe our products speak for themselves and that whether being used by a world class competitor in the sporting arena or by a mum on the school run, everyone can trust Maxxis products to deliver.
